To: glynt@hotmail.com <glynt@hotmail.com>

Hello Deer Lake Association Members,

Forwarding the below email to you for informational purposes from the U.S. Forest Service Cuba Ranger District, Mr. Patrick Petracca that was just received this morning. See below.

Thank You,

Krystal Rodriguez

DLA - Secretary

---

Good Morning,

For your awareness, the Cuba Ranger District will be pile burning beginning today and continuing through next week if conditions permit.

We will be burning piles of previously thinned and cured fuel materials, mostly smaller diameter ladder fuels.

Areas to be burned include:

- HWY 126 Corridor: Deer Lake, Clear Creek & Rio de las Vaca Campgrounds, Palomas, and Burned Canyon
- Forest Road 103 Corridor: Robinson private property boundary & Wetherill Estates

Today, Monday 12/11, we will focus on the two campground area piles.

Public roads will remain open during burning operations. Please be diligent in your travels and keep a watchful eye for Forest Service personnel and vehicles in the area.

Smoke may be visible from US HWY 550 and surrounding communities. Smoke is expected to be non-impactful, however smoke sensitive individuals residing in these areas should take necessary precautions to limit exposure.

We will keep you informed of progress/conditions throughout the operation.

**\*If you would like to be removed from future notifications, please reply and let me know.**

Have a safe day,

Patrick
